You want to discover new things in your career and develop yourself?

Then we are the perfect match! Neoeption offers you freedom for new ideas, a creative environment, and the opportunity to actively shape the future of automation technology.

Our team creates software solutions for Pepperl+Fuchs sensors in the context of the Internet of Things (IoT). Neoeption GmbH is an independent startup within the Pepperl+Fuchs Group. We offer web-based solutions that are tailor-made to the requirements of our customers. To help us do this ambitious work, we are looking for a:

Cloud Backend Developer

Your role:

- You will develop smart software solutions for cloud-first services.
- Your development tasks will range from background jobs to database design to sustainable APIs.
- Your solutions will encompass complex processes that are robust and fully automated.
- You will optimize our software for long-term maintenance, usability, and performance.
- As part of a team, you will work on complex, distributed application architectures.

What you bring to the table:

- You will develop smart software solutions for cloud-first services.
- Your development tasks will range from background jobs to database design to sustainable APIs.
- Your solutions will encompass complex processes that are robust and fully automated.
- You will optimize our software for long-term maintenance, usability, and performance.
- As part of a team, you will work on complex, distributed application architectures.

We are an energetic team with a passion for new technologies, motivated by constant curiosity and the desire to revolutionize the world of automation technology. For us, binary trees do not belong in the forest, and cookies are not just something served at meetings.

If $1+1=10$ makes sense to you and you want to be part of our team, we look forward to receiving your application. You can apply online with your résumé.
