You want to discover new things in your career and develop yourself?

Then we are the perfect match! Neoeption offers you freedom for new ideas, a creative environment, and the opportunity to actively shape the future of automation technology.

Our team creates software solutions for Pepperl+Fuchs sensors in the context of the Internet of Things (IoT). Neoeption GmbH is an independent startup within the Pepperl+Fuchs Group. We offer web-based solutions that are tailor-made to the requirements of our customers. To help us do this ambitious work, we are looking for a:

Embedded / Cloud Software Developer

Your role:

- You will develop smart software solutions for networked embedded devices.
- Your development tasks will range from embedded drivers to APIs in web backends.
- Your solutions will encompass complex processes that are robust and fully automated.
- You will maximize the performance of algorithms and minimize resource requirements.
- You will optimize our software for long-term maintenance and usability.
- As part of a team, you will work on complex, distributed application architectures.

What you bring to the table:

- You studied computer science or computer engineering, completed a comparable training, or have equivalent professional experience in software development.
- You know C# and SQL like the back of your hand. Java/JavaScript und C/C++ are close friends of yours.
- You are experienced with security technologies and the corresponding standards.
- Experience with industrial fieldbuses and Linux is a plus.
- Your written and spoken English is excellent.

We are an energetic team with a passion for new technologies, motivated by constant curiosity and the desire to revolutionize the world of automation technology. For us, binary trees do not belong in the forest, and cookies are not just something served at meetings.

If $1+1=10$ makes sense to you and you want to be part of our team, we look forward to receiving your application. You can apply online with your résumé.
