

## You want to discover new things in your career and develop yourself?

Then we are the perfect match! Our young startup offers you freedom for new ideas, a creative environment, and the opportunity to actively shape the future of automation technology.

Our team creates software solutions for Pepperl+Fuchs sensors in the context of the Internet of Things (IoT). Neoception GmbH is an independent startup within the Pepperl+Fuchs Group. We offer web-based solutions that are tailor-made to the requirements of our customers. To help us do this ambitious work, we are looking for a:

## Senior Web/Software Developer (m/f)

### Your role:

- You will build and maintain cloud-first applications
- Within the framework of customer projects, you will develop cool, custom front-ends for web applications
- You will be responsible for coordinating between internal and external developers to implement function modules
- You will optimize our software for long-term serviceability, usability, performance and testability

### What you bring to the table:

- You know common web/SPA frameworks like the back of your hand
- On the server side, you have experience in C# and/or Node.js
- Cross-browser compatibility, responsive web design, and a good user experience are part of your repertoire
- You have some familiarity with mobile development using Cordova with Ionic Framework
- Your spoken and written English is excellent

We are a young team with a passion for new technologies, motivated by constant curiosity and the desire to revolutionize the world of automation technology. For us, binary trees do not belong in the forest, and cookies are not just something served at meetings.

If  $1+1=10$  makes sense to you and you want to be part of our team, we look forward to receiving your application. You can apply online with your résumé.
