You want to discover new things in your career and develop yourself?

Then we are the perfect match! Neoception offers you freedom for new ideas, a creative environment, and the opportunity to actively shape the future of automation technology.

Our team creates software solutions for Pepperl+Fuchs sensors in the context of the Internet of Things (IoT). Neoception GmbH is an independent startup within the Pepperl+Fuchs Group. We offer web-based solutions that are tailor-made to the requirements of our customers. To help us do this ambitious work, we are looking for a:

Analyst/Software Architect/Team Lead - cloud services

Your role:

- You will analyze customer requirements and use them as a basis to develop complex application architectures.
- You will lead project-based development teams and see projects through from initial analysis to successful completion.
- On the path to a successful project, you will coordinate developers and partners.
- You will be responsible for parts of our technology stack and will continuously expand it.
- You will evaluate new technologies for Neoception services and integrate them into the platform.

What you bring to the table:

- You have at least 10 years of experience orchestrating cloud services and implementing complex IT architectures.
- You know C#, Java, JavaScript, und SQL like the back of your hand.
- You have experience with security technologies and current authentication layers such as OpenID Connect and OAuth 2.0.
- Experience with Linux, industrial fieldbuses, or data mining would be a plus.
- Your written and spoken English is excellent.

We are an energetic team with a passion for new technologies, motivated by constant curiosity and the desire to revolutionize the world of automation technology. For us, binary trees do not belong in the forest, and cookies are not just something served at meetings.

If $1+1=10$ makes sense to you and you want to be part of our team, we look forward to receiving your application. You can apply online with your résumé.
