

NEOCEPTION® eKANBAN LITE

The simplest form of RFID-based Kanban!

EASY TO USE

FLEXIBLE

SCALABLE

BENEFITS:

- ✓ One platform for all product groups
- ✓ No more unexpected supply shortages
- ✓ No more unresolved product discontinuations
- ✓ User-friendly process

Optimize processes within your supply chain through automated reordering, extending to a digital Kanban supply

THE SYSTEM STANDS OUT FOR ITS SIMPLICITY AND CONSISTS SOLELY OF:

- 1 RFID hardware for the detection of empty material boxes
- 2 Indicator light as an optimized booking confirmation signal
- 3 IoT hardware for communication with the software platform

STANDARDIZED

PLUG-&-PLAY

THE SYSTEM REQUIRES:

- No mandatory integration into your existing (ERP) systems
- No adjustment of existing processes.

User-friendly process

Real Time Visibility

Automate Workflow

Cloud-based SaaS

Versatile UI

Scalable and Customizable

MODULARITY AND SCALABILITY ARE ASSURED:

- Standard options include using scales, SmartLabels, and distance sensors to capture individual parts or long goods
- Global delivery capability is ensured
- No hidden costs – only costs are incurred for the desired functionalities

ADDITIONAL SATISFIED CUSTOMERS ARE:

HOW NEOCEPTION® eKANBAN LITE WORKS?

01

Triggering the requirement notification

- By a quick and easy RFID scan at the reorder station, a demand is triggered.

Location: Warehouse Consumer/end customer

02

Incoming orders

- Requirement notifications are recorded in the cloud-based system and made available via the interface.

Location: Digital/Cloud

03

Preparation for order picking

- If necessary, the required material can be ordered from suppliers so that it is already available when the empty boxes are received.

Location: Logistics/supplier

04

Order picking in the supply center

- RFID scanning of empty boxes at the picking station provides the employee with direct information about the required materials for the respective boxes.

Location: Logistics/supplier

05

Delivery and storage

- Delivery of the picked materials,
- Collection of empty boxes,
- Sorting the goods into the respective storage location.

Location: Warehouse Consumer/end customer

06

System administration

- Comprehensive dashboard for example: For analytics, error detection, and system monitoring.
